Drawings

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schwarz (US 2,840,130) in view of Fouquet (US 6,543,340). The patent to Schwarz discloses all the claimed subject matter except for a plug movably inserted in the feeding passage.

Art Unit: 1761

The patent to Fouquet discloses that it is known in the art to have provided a plug (18) movably inserted in a feed passage. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided Schwarz with a plug in the manner suggested by Fouquet in order to move the food through the feeding passage.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents are cited for further teachings of devices whose structure is similar to that instantly disclosed.
